Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of t publisher to collect any sums or considerations for copying or reproduction payable by third parties mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Acta of 1912) and/or to act in or out of Co in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearan Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use specific clients. This consent is given on the condition that the copier pays through the Center the per-co fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of article to the Copyright Clearance Center, Inc., 21 Congress Street, SALEM, MA 01970 (U.S.A.). If no co appears in an article, the author has not given broad consent to copy and permission to copy must obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee U.S. $2.25, also payable through the Center. This consent does not extend to other kinds of copying, such for general distribution, resale, advertising and promotion purpose, or for creating new collective wor Special written permission must be obtained from the publisher for such copying.

Special regulations for authors in the U.S.A. Upon acceptance of an article by the journal, the author(s) will asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possi dissemination of information under the U.S. Copyright Law.

Mutation Research, 113 (1983) 531–533
Elsevier

Contents

Volume 113 (1983)

The effect of short-term dietary modification on human fecal mutagenic activity
by Harriet V. Kuhnlein, Urs Kuhnlein and Penelope A. Bell (Vancouver) 1– 12

The effect of different genetic properties of *Salmonella typhimurium* on the determination of stabilities and mutagenic concentrations of chemical carcinogens using the diffusion bioassay
by Tamara E. Awerbuch and Anthony J. Sinskey (Cambridge, MA) 13– 19

The intragastric host-mediated assay for the assessment of the formation of direct mutagens in vivo
by Roberto Barale, Donatella Zucconi, Maria Romano and Nicola Loprieno (Pisa) 21– 32

Chemically-induced sister-chromatid exchange in vivo in bone marrow of Chinese hamsters
An evaluation of 24 compounds
by S.B. Neal and G.S. Probst (Greenfield) 33– 43

Genetic effects of the flavonols quercetin, kaempferol, and galangin on Chinese hamster ovary cells in vitro
by J.H. Carver, A.V. Carrano and J.T. MacGregor (Livermore and Berkeley) 45– 60

Short-term tests for transplacentally active carcinogens
A comparison of sister-chromatid exchange and the micronucleus test in mouse foetal liver erythroblasts
by R.J. Cole, J. Cole, L. Henderson, N.A. Taylor, C.F. Arlett and T. Regan (Brighton) . 61– 75

The activation of procarcinogens to mutagens by cultured rat hepatocytes in the L5178Y/TK mutation assay
by David E. Amacher and Simone C. Paillet (Groton) 77– 88

The relationship between growth and reversion in the Ames Salmonella plate incorporation assay
by E.D. Barber, W.H. Donish and K.R. Mueller (Rochester) 89–101

Interactions of histidine-containing test substances and extraction methods with the Ames mutagenicity test
by H.U. Aeschbacher, P.A. Finot and U. Wolleb (La Tour-de-Peilz) 103–116

Testing the mutagenicity of malondialdehyde and formaldehyde by the Drosophila mosaic and the sex-linked recessive lethal tests
by János Szabad, István Soós, Gyula Polgár and Gyöngyi Héjja (Szeged). 117–133

Sensitivity of *Drosophila melanogaster* to low concentrations of gaseous mutagens IV. Mutations in embryonic spermatogonia
by P.G. Kale and J.W. Baum (Upton) 135–143

The validity of the autoradiographic method for detecting DNA repair synthesis in rat hepatocytes in primary culture
by M. Lonati-Galligani, P.H.M. Lohman and F. Berends (Rijswijk) 145–160

The identification and characterization of a urinary mutagen resulting from cigarette smoke
by Thomas H. Connor, V.M. Sadagopa Ramanujam, Jonathan B. Ward Jr. and Marvin S. Legator (Galveston) 161–172

Revised methods for the Salmonella mutagenicity test
by Dorothy M. Maron and Bruce N. Ames (Berkeley) 173–215

ICPEMC — International Commission for Protection Against Environmental Mutagens and Carcinogens
ICPEMC News No. 5 217–220

European Environmental Mutagen Society
Abstracts of Papers presented at the 12th Annual Meeting of EEMS on Mutagens in our Environment, 20–24 June 1982, Espoo 221–327

Gesellschaft für Umweltmutationsforschung e.V. (GUM)
A German-speaking Section of the European Environmental Mutagen Society
Abstracts of Papers presented at the 7th Meeting, 1982, Berlin 329–351

Report on the Second International Workshop in Short-Term Mutagenicity Testing, Leiden
by G. Mohn and A.T. Natarajan (Leiden) 353–355
Evaluation of the alkaline elution/rat hepatocyte assay as a predictor of carcinogenic/mutagenic potential (MTR 08497)
by J.F. Sina, C.L. Bean, G.R. Dysart, V.I. Taylor and M.O. Bradley (West Point) 357–391
Evaluation of a methodology for the use of preparations from rat small intestine in the Salmonella/microsome assay (MTR 08498)
by J.M. Walters and R.D. Combes (Portsmouth) 393–402
A differential DNA-repair test using mixtures of *E. coli* K12 strains in liquid suspension and animal-mediated assays (MTR 08502)
by G.R. Mohn, P.R.M. Kerklaan, W.P.C. ten Bokkum-Coenradi and T.E.M. ten Hulscher (Leiden) 403–415
Mathematical model of L5178Y mouse lymphoma forward mutation assay (MTR 08499)
by Young Jack Lee and William J. Caspary (Bethesda) 417–430
An SV40 mammalian inductest for putative carcinogens (MTR 08500)
by Thomas P. Coohill and Sharon P. Moore (Bowling Green) 431–440
Quantitative mutagenesis at the adenosine kinase locus in Chinese hamster ovary cells
Development and characteristics of the selection system (MTR 08503)
by Radhey S. Gupta and Bhag Singh (Hamilton) 441–454
Autoradiographic detection of 6-thioguanine-resistant lymphocytes of mice
A novel system in somatic mutagenesis testing (MTR 08501)
by E. Gocke, K. Eckhardt, M.-T. King and D. Wild (Freiburg/Breisgau). 455–465
Cytogenetic assays for mitotic poisons
The grasshopper embryo system for volatile liquids (MTR 08505)
by Jan C. Liang, T.C. Hsu and J.E. Henry (Houston and Bozeman) 467–479
A rapid screen for cumulative chromosomal damage in mice
Accumulation of circulating micronucleated erythrocytes (MTR 08504)
by Robert Schlegel and James T. MacGregor (Berkeley) 481–487
Short-term tests for transplacentally active carcinogens
Induction of sister-chromatid exchanges in foetal brain, lung and blood-forming cells by procarbazine and cyclophosphamide (MTR 08513)
by Leigh Henderson, R.J. Cole, J. Whittaker, T. Regan and Helen Cole (Brighton) 489–498
A microtiter plate assay for the selection of 6-thioguanine-resistant mutants in Chinese hamster V79 cells in the presence of phorbol-12-myristate-13-acetate (MTR 08510)
by Dina Raveh and Eliezer Huberman (Beersheba and Argonne) 499–506

The Environmental Mutagen Society of Japan
Titles of Abstracts presented at the 11th Annual Meeting, 29–30 October 1982, Shuzenji (MTR 08506) 507–512

Local Activity Reports for 1982 given by the EEMS Councillors for their Country (MTR 08507) 513–525

The UKEMS Sub-Committee on Guidelines for Mutagenicity Testing (MTR 08508) by B.J. Dean (Sittingbourne) 527–529

Contents, Vol. 113 (1983) 531–533

Erratum 533

The Author Index and the Subject Index covering all volumes to appear in 1983 will be published as a separate issue by the end of the year

---

Erratum

Maron, Dorothy M., and Bruce N. Ames (1983) Revised methods for the Salmonella mutagenicity test, Mutation Res., 113, 173–215.

p. 177, line 4, the *his*D3052 mutation has the sequence $\begin{matrix}\text{-CGCGCGCG-}\\ \text{-GCGCGCGC-}\end{matrix}$

p. 182, line 3 from bottom, the sentence should read:
For reisolating TA102, tetracycline (2 μg/ml) is also added.

p. 199, lines 35–38 should read:
Preincubation procedure: Deliver 0.5 ml of S9 (or phosphate buffer, pH 7.4) to sterile 13 × 100 mm capped culture tubes placed in an ice bath. Add 0.1 ml of bacterial culture and 0.1 ml or less of test solution dissolved in H_2O or DMSO. This order of addition of the test components is preferred to avoid placing the bacteria in direct contact with the undiluted test compounds and their solvents.

p. 208, in line 4 of the recipe for Ampicillin solution (8 mg/ml), the heading should read: *Per 100 ml* (not *per liter*)
in line 3 of the recipe for crystal violet solution (0.1%) the heading should read: *per 100 ml* (not *per liter*)
